ABOUT THE CONFERENCE

The conference will serve as a global forum for researchers to present their latest findings, theories, and methodologies across various subfields of mathematics. A core goal is to demonstrate how cutting-edge mathematical innovations are being applied to address real-world problems in science, engineering, technology, finance, and other fields. By featuring keynote speakers, distinguished researchers, and presentation sessions, the conference will motivate students and early-career researchers to pursue careers in mathematical research and its applications. The event will offer numerous opportunities for attendees to connect with peers, establish new partnerships, and exchange ideas and perspectives in a collaborative setting. The conference aims to publish selected papers in book format through a reputed publisher, ensuring wider dissemination of the presented research to the academic community.
